Phase out of 16 Port Patch Panel

NEC would like to inform you about the phasing out of the 16 Port Patch Panel.

This panel can be used to connect to the RJ61 sockets of interface cards of the SL2100 and SV9100 platforms.

The 16 port panel splits out the combined ports of the interface card to 16 individual RJ45 sockets for connection into the customer's structured cabling infrastructure.

A compatible replacement is either the 24 port panel FFV24NECBK or the 40 port panel FFNEC50.

Phase out items

The following items are to be phased out.

Product code	Items	EON	EOD	EOS
FFV16NECBK	16 Port RJ45 Patch Panel, Black	01.06.2020	01.06.2020	01.06.2021

EON - End of New deliveries. The product cannot be ordered for new system sales. Existing systems can still be expanded with additional hardware.

EOD - End of Deliveries = EOM - End of Maintenance. Both new and expansion sales of this hardware are no longer available. The hardware and its associated firmware are no longer maintained, however repair or replacement service is still available.

EOS - End of Service. All service on the product have ended.
