SV9100, SV9300 and UG50 Analogue Trunk Cards

NEC is introducing a new Analogue Trunk Card and Daughtercard for the SV9100, SV9300 and UG50.

These will supersede the existing Analogue Trunk Cards.

Pricing aspects & Items

The following items will be introduced.

Product code	Items	Description
BE119151	GCD-4COTC-A	Analogue Trunk Card
BE119154	GPZ-4COTG-A	Analogue Trunk Daughtercard

They will replace the items listed below:

Product code	Items	Description
BE113031	GCD-4COTC	Analogue Trunk Card
BE113032	GPZ-4COTG	Analogue Trunk Daughtercard

Pricing for the new items will be the same as the current

Compatibility

The cards will offer the same functionality as the existing cards.
Existing cards and new cards can be mixed in a system.
Existing cards and new cards can be mixed:

- A GPZ-COTG-A can be placed on a GCD–COTC*
- A GPZ-COTG can be placed on a GCD-COTC-A

*Requires SV9100 CP10 A10.50.50, SV9100 CP20 10.50.50, SV9300 7.3.0, UG50 4.0

Availability & Order Information

The new Analogue trunk cards will be made available from mid-May.
