### Phase-Out of SV9100 Standard SIP license for NEC devices

NEC would like to inform you about the phasing out of the SV9100 Standard SIP license for NEC devices EU901002. This part provides a Standard SIP Extension license for NEC devices.

An alternative is to use EU901001 NEC STD SIP IP Phone01 license, this provides an identical license at the same price, and is now also available within Non-Configured items.

This is a 'tidy up' action and will have no effect to the operation of the SV9100 or the order process for our partners.

EU901002 was available via Non-Configured Items within Profix to allow partners to place orders for stock.

EU901001 was previously only available for configured NEC Standard SIP devices within Profix, we have now made it also available via Non-Configured Items.

*Note – monitoring by NEC remains in place to ensure that EU901001 licenses are only installed for use with NEC Standard SIP devices (IPDECT handsets, GT210, ST500 etc).*

### Phased-Out Items

The following items are to be phased out:

Product code	Items	EON	EOD	EOS
EU901002	SV9100 STD SIP NEC ONLY LIC	01/03/2020	01/03/2020	01/01/2026

**EON** - End of New deliveries. The product cannot be ordered for new system sales. Existing systems can still be expanded with additional hardware.

**EOD** - End of Deliveries = **EOM** - End of Maintenance. Both new and expansion sales of this hardware are no longer available. The hardware and its associated firmware are no longer maintained, however repair or replacement service is still available.

**EOS** - End of Service. All service on the product have ended.

### Last Time Buy

A Last Time Buy for the phased-out items is not necessary as an equivalent replacement license EU901001 is available.
