Release InScheduler for the SV9100

InScheduler is a new InApp for the SV9100 that provides a web browser user interface for scheduling either audio or web video conferences that makes it even easier for remote workers to stay in touch.

InApps are built-in to the SV9100 and require no external server or PC to run, user's access via their web browser.

The audio and web video conferences are also built-in to the SV9100!

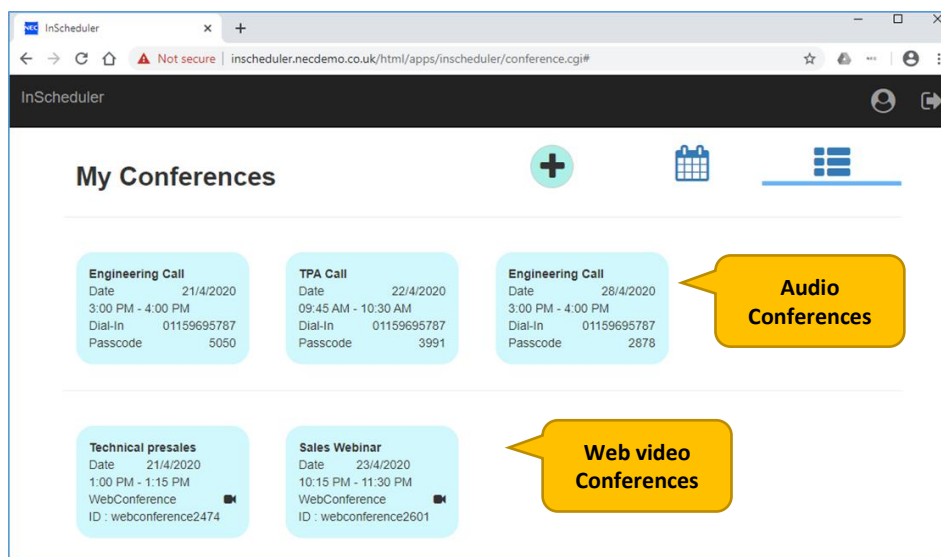

InScheduler brings the built-in audio and web video conferencing features within the SV9100 to a simple to use scheduling application and gives the user the ability to view, book new meetings and easily invite participants by e-mail.

The SV9100's built-in audio conference supports a total of 96 participants with a limit of 32 per conference room.

There are up to 20 conference rooms available, each accessed by a dynamic 4 digit PIN setup within InScheduler.

The SV9100's built-in web video conference supports a total of 32 participants with a limit of 8 per conference room.

InScheduler is an easy to use application that requires little or no user training due to the intuitive user interface

New conferences are created by selecting the choice of dial-in audio or web video, enter the subject, select the start and end times, how many participants expected and choose a PIN code for secure access.

Participants are invited by e-mailing the joining instructions, dial-in number or web video link, which are available once the meeting is created.

The conference appointment can also be saved as an .ics file to add into your Outlook calendar.

Invite - Dial-in audio conference

Invite - Web video conference

Compatibility

InScheduler is available for the SV9100 CP20 system with v10.5 Main Software or later.

Pricing aspects & Items

Pricing can be obtained from Prophix.

InScheduler requires a system licence that will support all users.

Dial-in audio conference require a license per room.

There are 4 Web video channel licenses built-in with the SV9100, additional channels will require a license.

License		Comments
BE118840	SV9100 INSCHEDULER LIC	InScheduler system license
BE114073	SV9100 REMOTE CONF-01 LIC	Conference room license (max = 20)
BE115845	SV9100 WEB VIDEO CNF-01 LIC	Web video channel license (max = 32) 4 included with the SV9100

For the Dial-in audio conference a VRS channel BE114082 is required for the input of the PIN code, there are two channels built-in with the SV9100, but if the system is using VRS channels for other functions it may need additional channels adding.
