InFIAS 2020-052

### Pricing aspects & Items

All pricing is available with Prophix CPQ.  
There are no new licences required, existing customers can use the new features by upgrading to the latest InApp version.

### Documentation

Installation and User Guides are available on BusinessNet within each platform area.  
The latest InApp Infosheets are also available on BusinessNet.

## Availability & Order Information

There are no updates required within Prophix CPQ.  
Software is available now for download from the Software Database.

*Note 1 – 8 Digit DDI support is only available for the SV9100 CP20 with Main Software 10.60.55 or higher.*

*Support for the SL2100 will be provided in a later release of Main Software.*

*Previous versions of InGuard and InReports supported 6 DDI digits, as the platforms have always supported 8 digits it has been requested to bring the InApps into line.*

*Note 2 – HTTPS implementation limits the quantity of simultaneous InApp connections to 10.*

*HTTPS is available with the SL2100, SV9100 CP10 and SV9100 CP20, it is recommended to upgrade to the latest versions of Main Software in order to have the latest security fixes and operation.*
