

SALES & MARKETING BULLETIN

DL43461416 OCTOBER 22

NEC

Introduction

This Portfolio Bulletin informs you of the release of the SL2100 R4.0 Main Software.

Consistently improving the product, we now announce the release of SL2100 R4.0 software giving features and improvements to the portfolio.

R4.0 software includes these new and enhanced features:-

Support for Built-in VOIP License

The Built-in VoIP channels can be increased from 8 to 16 with the addition of a new SL2100 B-IN VOIP EX LIC license, without the need for additional hardware.

This new licence increases the built-in VoIP resources available for IP trunks and extensions.

+

BE120530
SL2100 B-IN VOIP
EX LIC
8 ch

= 16 Channels
(8 Built-in + New License)

The new licence is available for all SL2100 CPU cards:

- CPU-C1 BE116498
- CPU-C1-A BE117657

Prior to R4 Main Software the increase to 16 VoIP channels would have required the installation of the IP7WW-VOIPDB-C1 card, this is now only required for 17 or more VoIP channels.

Pricing aspects & Items

The following new items are now supported with SL2100 R4.0 Main Software.

Product code	Items	Description
BE120530	SL2100 B-IN VOIP EX LIC	Adds 8 VOIP channels to Built-in VOIP, increasing VOIP channels from 8 to 16.

Pricing can be obtained from your NEC representative/Channel Manager or ProphixCPQ
