NEC

Updated NEC Partner eDelivery Center

The eDelivery Centre is one of the NEC Enterprise BizApps and provides access to the electronic delivery infrastructure for software products and licenses. With NEC's strive to continuously improve and simplify, we are happy to announce a new eDelivery Centre.

The new eDelivery centre has a subtly improved user interface which supports an extended search function, simplifying the search for specific licence delivery information for your orders. Major change is "under the hood" as the technology or data structure has been changed to improve the safe storage of your valuable licence information, while documents are created dynamically. This ensures that the information in the eDelivery Centre is always correct and up-to-date.

Appearance & Operation

The new appearance of the NEC Enterprise BizApps eDelivery Centre:

Partner eDelivery Portal Details						
Search: All Text Columns		Go	Actions		Reset	
Download	Created	Customer Order No.	Sales Order No.	Document Name	Parts	Comments
	26-OCT-2021	4500484347	2500667837	LDP_2500667837_LLMS.pdf	BE119861 BE112031 EU910078 960026189000	

The new eDelivery Centre appearance has not changed significantly, but you will notice some subtle differences, like the order of displayed fields and also that less informative fields are not shown by default. Accessing the licence information remained the same; clicking the icon in the "download" column will open a PDF with licence information to view or download.

Users can search for specific licences with the search function, or adjust the current column display order and column visibility using the "Action" button.

Availability

The updated NEC Enterprise BizApps eDelivery Centre will be available per December 1st, 2021

Support

In case of any issues experienced with the new eDelivery Centre where support/assistance is required, please make a call to the NEC Support Team - BizApps via the [Call Registration](#) on the NEC BusinessNet.
