PMS-InConnect 1.2.0

PMS-InConnect is one of the groups of InAPPs for the SV9100 and SL2100 platforms. PMS-InConnect is an always-on application that runs on the SV9100 and SL2100 platforms 24/7.

It is designed to provide integration between the PMS interface and a Front of House system complying with the MicrosFidelio FIAS 2.2x protocol. InFias, like all InAPPs, is a browser-based embedded application.

This release of PMS-InConnect software enhances the application still further by adding support for AccorFOLS and, with the addition of the InGuestline plug-in, Guestline.

PMS-InConnect is one of the groups of InAPPs for the SV9100 and SL2100 platforms. PMS-InConnect is an always-on application that runs on the SV9100 and SL2100 platforms 24/7.

It is designed to provide integration between the PMS interface and a Front of House system complying with the MicrosFidelio FIAS 2.2x protocol. InFias, like all InAPPs, is a browser-based embedded application.

This release of PMS-InConnect software enhances the application still further by adding support for AccorFOLS and, with the addition of the InGuestline plug-in, Guestline.

Compatibility

Compatible with FIAS 2.2x, the same PMS-InConnect-1.2.0 package can be installed on SL2100 and SV9100. The architectural differences are handled automatically.

Pricing aspects & Items

Pricing can be obtained from your NEC representative/Channel Manager or CPQ.

Documentation

Documentation relating to InFIAS is available for download on BusinessNet.

Availability & Order Information

The new functionality is available to order in CPQ, and the software can be immediately obtained from the NEC Software Database.
