## Phase-out announcement: GT890 Terminal

NEC would like to inform you about the phasing out of the GT890 terminals.

### Pricing aspects & Items

The following items are to be phased out.

Product code	Description	EON	EOD	EOS
BE118385	ITX-3370-1W(BK)TEL	30/11/2023	30/11/2023	30/11/2024
EU915200	GT890 Power Supply	30/11/2023	30/11/2023	30/11/2024

**EON - End of new deliveries.** The product and product related sales articles cannot be ordered anymore for new system sales. However, current systems can still be upgraded with new software and expanded with additional hardware and licenses during the EON period. Platforms only: The phased-out platform can in this timeframe also be added as new nodes to an existing cluster which comprises any of these servers. Delivery time may take longer than usual (up to 4 months).

**EOD - End of deliveries.** The product and product related sales items cannot be delivered any more.

**EOS - End of Support.** Technical support is available at a reduced level. Support Incidents are only accepted based on the last (final) Maintenance Release. Previous bug-fixing software updates are still available however new bug-fixes are no longer provided. Spare parts can still be obtained, and repairs services are available.

### Availability & Order Information

Although the products will be available whilst stocks last, last time buy requirements, particularly larger orders, should be received by 30/11/2023 in order to ensure stock is available from manufacturing. Please consider that due to stock levels orders may be subject to lead times of 3-4 months.

The status of the GT890 Terminals will change to EOD (End of Deliveries) either on the 30<sup>th</sup> November 2023 or when the stock levels held in EMEA are depleted whichever is sooner.
