TigerTMS Portfolio Update

NEC is delighted to announce that with the addition of R14 software for SV9100, and the SIP extension for voicemail feature, the TigerTMS innLine Hospitality voicemail Products are also now available connected with the SIP extension interface for the SV9100 platform.

Compatibility

The TigerTMS portfolio is available for all SV platforms and the UNIVERGE 3C platform.

Pricing Aspects & Items

The pricing structure of TigerTMS will remain the same, Prophix CPQ has been updated for the SV9100 platform so that SIP extension licences are configured for the required innLine voicemail ports for SV9100.

Pricing can be obtained from your NEC representative/Channel Manager, Prophix CPQ, and in Portfolio Insight.

Order Acceptance & Delivery

All orders will be accepted from CPQ with immediate effect. If you have any questions or request concerning the information in this letter, please contact your NEC representative/Channel Manager.

Documentation

For additional information, refer to NEC BusinessNet.

Additional Partner Materials

With the release of this enhancement for the TigerTMS portfolio, NEC has also updated and extended the available commercial materials that enables you as our partner in positioning and selling the solution in combination with the NEC platforms.
