NEC

PMS-InConnect Update

NEC is delighted to announce that with the release of **PMS-InConnect software v1.3.0** for SV9100 and SL2100, there is now a selectable option that enables the refresh of an InMail Guestroom Mailbox on either check-in or check-out.

PMS-InConnect is an on-board application within the suite of InApps that can be loaded onto the CPU of the SL2100 or SV9100 platforms.

PMS-InConnect is a middleware Application that is used in conjunction with an additional Front of House hospitality program which requires the translation of FIAS 2.21 compatible messaging in order to communicate with the SV9100 or SL2100 system.

PMS-InConnect is compatible with microsFidelio Opera, Hotsoft8, AccorFols, Protel-EMMA and numerous other FIAS compliant front of house systems.

InMail is the built-in voicemail system of the SL2100 and SV9100 and provides a mailbox function for the Hotel guest room telephone.

With PMS-InConnect v1.3.0 it is now possible to select the InMail voicemail message retention option when the guest checks out of their room – any messages can be deleted on check-out or retained until the next guest is checked-in.

The selection of message delete/retain is often a requirement of the Hotel chain.

PMS-InConnect v1.3.0 provides a system wide selection that is applied to all guest mailboxes.

Compatibility

PMS-InConnect is available for SV9100 and SL2100 platforms.

It is recommended that the latest Main Software version is used with PMS-InConnect v1.3.0.

- SL2100 is currently R5.20.00
- SV9100 is currently R14.10.50

Pricing Aspects & Items

The pricing structure of PMS-InConnect will remain the same, the new feature is available by a simple firmware upgrade.

Pricing can be obtained from your NEC representative/Channel Manager or Prophix CPQ.

Order Acceptance & Delivery

All orders will be accepted from CPQ with immediate effect. If you have any questions or request concerning the information in this bulletin, please contact your NEC representative/Channel Manager.

Documentation

For additional information, refer to NEC BusinessNet within the SL2100 or SV9100 Platform Areas.

Additional Partner Materials

With the release of this enhancement for the hospitality portfolio, NEC has also updated and extended the available commercial materials that enables you as our partner in positioning and selling the solution in combination with the NEC platforms.
