Note: List of all released software versions since [major] or [minor] software release in SWS

2 Changes

2.1 Implemented Change Requests / New features

Tracking Reference	Internal Reference	Summary
	OSBIZP-3034	Support the TMANIN/TLANIN cards on Manager E

2.2 Resolved Reported Problems / Symptoms

Tracking Reference	Internal Reference	Summary
PRB000063711	OSBIZP-4203	Wrong version in KC-Manager
	OSBIZP-4241	SME_iFT – Manager E 782 can't read KDS from OSBiz V2 hardware

2.3 Resolved Vulnerabilities

Not applicable for this release

3 Important Issues, Workarounds, Hints and Restrictions

This section provides the latest information at time of software release and is only pertaining to the time of release notes generation.

3.1 Important Issues

Not applicable for this release

3.2 Workarounds, Hints

Not applicable for this release

3.3 Restrictions

Manager C is not supported to administer an OSBiz V1 system

4 Installation and Upgrade / Update

4.1 Installation

4.1.1 Data and information security

It is mandatory to apply the Security Checklist so that system default settings are hardened according to best practices. This is most relevant after a first installation, but also strongly recommended after each Major or Minor version upgrade. It presents a checklist to ensure all necessary installation and configuration steps can be taken and adapted to the individual customer's environment and security policy. Deviations from the standard settings should be documented in the security checklist in consultation with the customer's contact person.

The best possible standard of data security and protection is only provided on our latest solutions or product versions. It is recommended to regularly install product updates in order to remove identified security vulnerabilities and software defects, improve stability and add latest functionality.

Country-specific regulations must be observed.

The latest version of "OpenScape Business V3 - Security Checklist" can be found under the following link: <https://nuxeo.unify.com/nuxeo/site/proxy/nxdoc/view/raw/b2efab60-4ba8-491c-988d-870077267c4a>

4.1.2 Safety improvements for Xpression Compact

Block outgoing traffic from Xpressions Compact (IVM) mailboxes by setting all IVM ports to system class-of-service (COS) 'outward-restricted' for day and night within HiPath 3000 Manager E.

Disable substitute feature for all mailboxes by deleting it from the IVM mailbox COS. For new installations IVM COS 3 shall be used as default instead of IVM COS 4.

Customers who need specific HiPath Xpressions Compact Features

The general rule above reliably blocks toll fraud but disables also the following features:

- o Call back external party from voice mailbox
- o Message notification call to external destination
- o Call forwarding to substitute number
- o Auto-attendant for external destinations
- o Xpressions Mobility (V3 only)
- o Xpressions Conference (V3 only)

In order a user to activate the above-mentioned features he has to set up a secure configuration in IVM.

In Auxiliary equipment - IVM - Additional Settings - Additional, the parameter "High-Security-Level IVM" is removed and the necessary security administration from now on will be possible through IVM's Web Based Management.

4.2 Upgrade / Update / Migration

4.2.1.1 Warning message for EVM and IVM ports

When a kds is retrieved or saved on an H3k/OSBiz system, the COS configuration is checked by Manager E. If an EVM/IVM is present and the ports belong to a COS group containing at least one trunk group that is not 'Outward restricted' a warning message will appear to improve security.

The warning message is also displayed when opening a H3k kds that is stored locally in the hard drive.

The error message cannot be deactivated unless the proposed configuration is applied.

4.2.2 Fallback

Not applicable for this release

4.3 Special settings and instructions

Not applicable for this release

5 Hardware and Software Compatibility

5.1 Hardware

Not applicable for this release

5.2 Firmware

Not applicable for this release

5.3 Loadware

Not applicable for this release

5.4 Software / Applications

5.5 Operating systems

Operating System Name	Operating System Version
Server	
Windows 2012 R2 - 2019 Server	All (32bit and 64 bit)
Clients	
Windows 8/8.1	All (Enterprise Edition is tested)
Windows 10	All (Enterprise Edition is tested)

5.6 Compliant products

This section lists the versions associated with the communication platforms, other products and third-party products that have been tested for use with this version of the product and are known to work.

5.6.1 Other products

Not applicable for this release

5.6.2 Third-Party products

Not applicable for this release

6 Service Information

6.1 Management information base

☐ Product sends SNMP V2 traps ☐ Product sends SNMP V3 traps ☐ Not supported

The following MIBs are supported:

6.2 License management

This product is licensed using:

☐ CLS ☐ CSC ☐ Other or not relevant, as described below

6.3 Remote serviceability

This product is certified for the following:

☐ RSP ☐ HiSPA ☐ RTPatch ☐ Other remote access or not relevant, as described below

6.4 Product tooling structure

Main Category	Management
Product Family	HiPath Meta Management
Product	HiPath 3000 Manager E
Product Version	HiPath 3000 Manager E V10
Product Item Number	P30152-P1532-P3-43

Main Category	OEM Products
Product Family	T-OCTOPUS F TOOL
Product	KC-MANAGER
Product Version	KC-MANAGER F200-F650, F270 IT
Product Item Number	P30152-P1532-T3-43

6.5 Case tracking system

Tickets can be generated and tracked via the Atos WEB Support Portal (AWSP).

<http://atosunify.service-now.com/unify>

A short instruction can be found on the AWSP directly.

7 Documentation Reference

The product documentation can be found on the Atos Unify Partner Portal <https://unify.com/en/partners/partner-portal> under Sell - Portfolio Information.
